Class Descriptions

Mindfulness & Traditional Culture These classes strive to cultivate awareness of the mind, body, and environment. Classes included Heart Sutra memorization, walking meditation, Baduanjin, and Zen Reflection Hour.

Creativity - These classes aim to stimulate imagination and originality, and inspire students to think outside the box. Classes included Irish Mask Making, Mexican Piñata Crafting, and Filmmaking.

Model UN & International Culture - Model UN debates take real-life experiences and empower students to maturely argue their points and defend their positions. Students held a debate to influence student phone access policy and determine the consequences for rule-breaking. International culture classes expose students to people and communities around the globe. These included classes on Dia de los Muertos, Japanese Culture, California Life, Brazilian Culture, Irish Folk Stories, and studying abroad.

Community Building and Personal Growth - These classes/experiences emphasized the importance of balancing independence and interdependence along with ethics. To cultivate these values, we played sports, created two self-governed films, completed a high-ropes obstacle course, and had a campfire with roasted marshmallows!
